Enzyme Cleaners®

Sanilabs Inc.

Sanilabs Line of Enzyme / Biological cleaning products have undergone extensive research testing to maximize performance. Working in conjunction with a leading North American Enzyme manufacturer, Sanilabs Enzyme Product line consists of proven enzyme cleaning biochemistry products. Sanilabs Enzyme line includes:

1. Floor & Grout Cleaner

A concentrated biological / enzyme cleaner specifically designed to address greasy hard surface floor environments such as commercial kitchens. This products enzyme formula works by attacking and digesting floor greases, increasing both wet and dry surface slip resistance. Improves floor & grout safety, look and cleanliness.

2. All Purpose Cleaner

A concentrated biological / enzyme all-purpose cleaner and deodorizer. This product can be used on all water washable hard surfaces, as well as a carpet and upholstery spotter and deodorizer.

3. Odour Counteractant

A concentrated biological / enzyme product that works by attacking the root cause of offensive odours, not just masking them. Eliminates problematic malodours such as decaying food, dumpster, garbage chute, restroom,

smoke and mildew / water damage odours. Use on hard surfaces, also safe on carpets and various fabric type surfaces.

4. Cutlery Pre-Soak

Concentrated cutlery pre-soak. Breaks-down baked-on carbons, kitchen greases and remnant foods from utensils. Safe on silverware & stainless steel.

4. Grease Trap Maintainer

Concentrated grease trap maintainer. Helps maintain and deodorize grease traps and floor drains. Won't harm plastic piping.
