

## Sanilabs EcoAssure™....

### The Chemistry of Green

What is green? What is environmentally friendly? Much confusion, and unfortunately, some deception arise from within the industry concerning these issues. Some promote that anything "natural" is green or environmentally responsible. Sometimes, this may be true. Other times, there is no real data to suggest that the "natural" material is any more environmentally responsible than similarly functioning materials that are man-made. Others find reasons, sometimes based on obscure data (even though often far greater data exists to support the opposite position) to rationalize and support the materials found in their specific products or to refute the use of materials found in other products. In other words, they are defining their own green criteria, leading to further confusion. Sanilabs EcoAssure™ Line of Green Floor Care Products is committed to one truth. Our EcoAssure line of Floor Care Products meets or exceeds All criteria contained in major N.A. Environmental Standards....*Sanilabs EcoAssure™ Green Chemistry, a commitment to Customers and our environment.*

Sanilabs EcoAssure™  
Green Floor Care Solutions

#### Sanilabs EcoAssure™ Floor Line Meet or Exceed All North American Green Standards:

- Contain no zinc or other heavy metal crosslinker
- All organic ingredients are readily biodegradable
- Non-corrosive pH values
- Contain less Volatile Organic Compounds (VOC's) than regulated by all NA standards
- Are not flammable or combustible
- Contain no alkylphenol ethoxylates, phthalate, ethylenediaminetetraacetate (EDTA), 2-butoxyethanol (butyl cellosolve) or other regulated glycol ethers
- Contain no ozone depleting compounds
- Meets all NA regulations for eutrophication (total phosphates)
- Contain no bioaccumulative pefluorooctance sulfonate
- Contain no carcinogen
- Contain no known reproductive toxin, mutagen, teratogen, or fetotoxin
- Contain no known endocrine disruptor
- Packaged in recyclable packaging

# EcoAssure™ Floor Care®

## Sanilabs Inc.

Sanilabs Line of EcoAssure™ floor care products meet or exceed All North American Green Standards and have been formulated with both the environment and performance in mind. Sanilabs EcoAssure™ Line of Floor Care Products include the following:

### EcoAssure™ Floor Finish

Formulated without zinc or other heavy metals. Provides a high level of mark

resistance. Suitable for use in any maintenance system.

### EcoAssure™ Floor Sealer

Formulated without zinc or other heavy metals. A semi-permanent base coat for use on resilient and non-resilient flooring.

### EcoAssure™ Neutral Cleaner

A commercially neutral cleaner formulated with biodegradable surfactants, safe for use on any water-washable surface. Ideal for use as a routine floor cleaner. Provides a low foaming profile for mop and buckets as well as

autoscrubbers. May also be used on countertops and other surfaces requiring a streak-free, light duty cleaning. Provides powerful odour counteraction, leaving behind a freshly cleaned scent.

### EcoAssure™ Floor Stripper

Very low odour product, ideal for use in health care environments or other facilities where a low odour is desirable. Non-corrosive pH makes it an excellent choice for use on pH / chemical sensitive floors (rubber, linoleum). Designed for removal of **EcoAssure™ Floor Finish**, as well as an effective stripper on metal-interlocked floor finishes.
