

Sanilabs...Odour Control.

Most odour control products work by masking a malodour. These types of products simply introduce a stronger scent or fragrance, so that the original malodour is overpowered. As a result, the original offending odour is still present and is simply being masked by perfumes. Sanilabs product capability includes the longer term treatment of malodour, the ability to attack the root cause of the odour. Sanilabs odour control products offer a true odour counteractant approach. Sanilabs odour counteractants work by reducing or eliminating the original source of the malodour itself. Sanilabs a *refreshing* name in odour control.

Odour Control[®]

Sanilabs Inc.

Helping you control malodour

Sanilabs Odour Control line of products offer solutions to a wide variety of odour control needs. All Sanilabs odour control products are highly concentrated for variable end-use dilution applications, while providing a variety of after-use fragrance accommodations. When eliminating malodours, Sanilabs is a *re-freshing* name in odour control. Sanilabs Odour Control Products include the following:

Ban-O-Dor

Ban-O-Dor is formulated to address the most challenging malodour problem areas, including multi-residential garbage bins / chutes, diaper pails, urinals, waste receptacles, water damage mildew odours, post fire smoke damage and decaying food remnant odours, amongst others.

Odour Master 300

Odour Master 300 provides powerful odour counteraction while leaving behind a pleasant herbal mint after-scent. Odour Master 300 can be used as a surface or space spray, as well as an odour counteractant boost to non-germicidal hard surface and carpet cleaning products.

Odour Master 400

Like Odour Master 300, Odour Master 400 may also be used as a surface or space spray and as an odour counteractant boost to non-germicidal hard surface and carpet cleaning products. Odour Master 400 counteracts malodors while leaving behind a fresh non-descript scent.

Enzyme Odour Counteractant

A concentrated biological/enzyme odour counteractant. Enzyme formula makes it highly effective for long-term malodour treatment. Safe for use on all water washable surfaces, as well as carpets, upholstery and fabrics.
